CORPORATE OVERVIEW

Vision

Medford Powell's team of trusted advisors are dedicated to delivering sound and proven methodologies to improve our clients' mission performance with measurable results.

Mission

Medford Powell's advisors provide insightful strategic planning, sound information security architecture protection, and effective project management while building lifetime client relationships.

Medford Powell LLC evolved out of the need to provide maximum information security protection for technically demanding DoD intelligence organizations, information technology strategic planning, and project management. This led to a company, with a core competence designed to implement security solutions, manage successful projects, and provide IT strategic planning to support your organization's goals.

OUR SOLUTIONS INCLUDE:

- **Consulting and Guidance – Medford Powell** will work with your executive and technical teams to ensure that solutions are added in compliance with organizational standards.
- **Security Engineering – Medford Powell** will implement proven security techniques designed to defend your infrastructure by installing security solutions across all layers.
- **Infrastructure Security Documentation – Medford Powell** can assist with documenting your organization's existing and/or planned security infrastructure.
- **Security Posture Assessments – Medford Powell** will examine your information system and determine what vulnerabilities may exist and the measures needed to mitigate them.
- **Cleared Security Personnel – Medford Powell** because of the importance and sensitive nature of your information, all Medford Powell security consultants undergo a rigorous DoD background investigation as most of our consultants hold a DoD security clearance at the Top Secret level including a polygraph.
- **Enterprise Architecture – Medford Powell** will execute Enterprise Architecture activities with federally accepted standards and guidelines to ensure that the agency information technology and business systems are aligned with business goals, are capable of change in continually changing business and technology environments, can reuse enterprise system assets and are cost effective.
- **Project & Program Management – Medford Powell** will provide professional project management services that lead to results. We understand the importance of execution; and that delivering your project on time, on budget, and with superior quality are the factors that will determine the success of meeting your organizations goals.

OUR FOCUS:

Medford Powell provides information technology strategy, management, and security solutions for all things related to the protection of your critical assets.

OUR APPROACH:

The **Medford Powell** team is excited to embrace information technology challenges; both complex and simple in nature. At Medford Powell, we provide sound and proven solutions able to fit your business mission, protection needs and budget. We pride ourselves on our staff management practices which maximize delivery of services.

OUR MARKET:

Medford Powell has experience working with a number of Government [DoD and Federal Agencies] clients. Future ventures include expansion into the Healthcare and Non-Profit industries.

Medford Powell, LLC Solutions

System Security Evaluation

Medford Powell's System Security Evaluation solution includes the overall audit and inspection of your information system's security posture. Medford Powell's security consultants are trained certified and experienced with industry best-practices assessment methodologies including the NSA-Infosec Assessment Methodology (NSA-IAM). Medford Powell's evaluation philosophy involves security assessment across all layers. To achieve this, Medford Powell's proven security evaluation services include:

- Security Requirements Traceability
- Security Testing and Evaluations
- Site Security Plan & Policy
- Security Concept of Operations

Enterprise Architecture & Program Management

Medford Powell's Enterprise solutions leverage current methodologies which are customized to your unique needs while ensuring compliance to OMBs requirements. It is designed to help your organization identify critical gaps in IT assets and supports the identification of future needs. **Medford Powell's** project and program management solutions ensures projects are on time, meets quality objectives and are within designated cost targets:

- Schedule Management
- Quality Management
- Cost Management

Medford Powell, LLC Focus

In today's world, an organization relies heavily on one of its most critical assets – information technology and it's data. **Medford Powell's** IT management strategy approach takes into account an organization's strategic plan, goals and objectives ensuring the IT assets are acquired and aligned with it mission. **Medford Powell's** project management approach leverages the knowledge and experience of certified project and management professionals with proven track records for quality, cost and schedule success. **Medford Powell's** Security solutions are designed to help your organization identify and measure the risk to its data. Our Security solutions will further assist you by using industry best practices and defense in depth charters to evaluate the security posture of your information systems. In order to provide a complete solution, **Medford Powell's** security experts will help identify and mitigate vulnerabilities meant to disrupt the confidentiality, integrity and availability of your information system.

OUR MISSION

Medford Powell is committed to providing sound and proven information technology and management solutions that meet business mission, protection needs and budget requirements.
